## Welcome everyone to the 9th Annual Sale.

I look forward with great excitement to hosting the 9th annual bull and female sale on 14th August 2021. No one is any more rigid or more resilient than the Australian farmer. The preceding years of drought have proved this. With this phase passed, for now, the last 12 months have just been phenomenal with the improved season and incredible prices received for our cattle. The cattle business is undoubtedly delighted to have received this blessing. I know I am so very grateful.

It certainly was a time of challenges and surprises for all of us. Like always, farmers stood stronger and met those challenges head-on and now have come out the other side with leaner, meaner, more efficient enterprises that will be much stronger as we advance. We are very excited for the better times ahead and the market to continue.

When I helped Roger Fuller Pty Ltd out during the worst of the drought, I observed that the better, thicker, more muscled Angus calves continued to sell better than the plainer types by as much as a dollar per kilo, maybe even more at times. And that the rougher, more basic type cattle were at times struggling to get a bid. So, the better genetics, (the thicker more muscled, growthier better-looking calves) during those tough times were undoubtedly paying off for those vendors. However, in more recent times, we are all looking like geniuses with our receiving prices. Even those who are selling unmarked poor-quality cattle are receiving reasonable prices for them. It is even more important to be paying attention to the quality of genetics we introducing into our herds in these excellent market conditions. So, we are in a position to have quality cattle available in more challenging market conditions. We cannot go through life thinking we are geniuses; we need to learn as we go through it continually.

Our job as cattleman is to give the market what it wants, which starts with bull selection. The 24 bulls in this catalogue will sire you thicker, bigger butted, growthier calves to make you more dollars on sale day. Timing is everything and today is the day to prepare for the opportunities ahead. Pentire Angus offers 30 years of commitment to breeding the best we possibly can. And many more years ahead and hopefully generations. That will put you and your cattle in the best position to take advantage of what the future has in store. The genetics up for sale have the ability to add carcass shape, thickness, easy doing ability, outstanding phenotype and, in the long term, leave you with an excellent line of great-looking, fertile and functional replacement females. Our top-quality bulls are presented each year through our annual sale in perfect condition, so you, as the potential buyers, can view them and notice their genetic merit to the fullest. Each one of our bulls is ready to go straight to work for you and your herd. I think on Pentire Angus breed character type, it is the evenest draft of bulls and heifers I have presented, and I confidently describe it as the best back end to a sale I have ever produced. I am so grateful over the years to have great supporters of the Pentire Angus program. To every one of you, I would like to say thank you. Whether you bought cattle, or bid on cattle, or came to observe and see the Pentire Angus program.

Thanks a lot! I truly appreciate you!

Cheers

Justin Richards

## **SALE INFORMATION**

#### **INSPECTION**

Sale cattle may be inspected anytime by arrangement with the vendor or the agent. Bulls will be penned by 10 am sale day.

#### **ADDITIONAL INFORMATION**

A supplementary sheet will be available with weights & scrotal sale day. GST: Prices for all lots sold will be GST exclusive. Gst will be added to the invoice.

#### **REBATE**

Vendor will provide a 2% rebate to outside agents introducing buyers in writing 24 hrs before the sale and settling on their behalf within 7 days.

#### **DELIVERY**

The vendor will provide delivery to most major selling centres in NSW. Or to your property for a small delivery fee to cover fuel expenses. As soon as possible following the sale. The vendor is willing to hold any animal over for two weeks free following the sale; after that, they will incur an agistment fee.

#### HEALTH

All bulls are vaccinated for vibrio and 7 in 1. Pentire Angus is located in a Bovine Johnes Protected area. Are Drenched with ausmectin and have received Multi Min shots.

#### **SAFETY**

Visitors enter the pens at their own risk. Children under the age of 16 are not allowed in the pens. At Pentire, all care and due diligence is undertaken to ensure livestock pose a minimum threat to our clients, staff, and us. However, we cannot predict nor guarantee their behaviour. All sale bulls have been assessed for temperament and are guiet to handle under normal circumstances. Unfortunately, sale day places abnormal pressure on bulls as they are not used to having a crowd of people around them, and so the behaviour of even the quietest bull can be unpredictable. While inspecting the sale bulls, we ask you to treat them with respect and don't overcrowd them with this in mind. Bulls may also fight in the pens, and at these times, they are oblivious. To their surrounding, including people.

Don't let others fool you, and good cattle can be good looking.

Cattle with eye appeal can hang a good carcass, wean a big calf and make you a profit. Enjoy your cow base. Love how they look, how they function and let the cattle make you a profit.

BUY your BULLS from a CATTLEMAN not a SALESMAN.

## **CHARLIE THE DONKEY**

## **CHARLIE THE DONKEY**

Castrated male, John

**DOB:** 21/10/2019

Sire: CHESTER Dam: ASHLEY

66 We will utilise our knowledge of the Angus Breed using their efficiency, doing ability and constitution. We are combining this with the maternal strength and carcass shape of the Pentire Angus Herd. Complimenting this with the appropriate outcross genetics will take our clients' herds and the industry in general forward into the future by reducing the costs of production for our clients with cattle that can thrive on grass and stack the genetic gain in client's herds for massive productivity gains.

- Justin Richards

Mt Hunter Magistrate M5 is once again strongly represented in the catalogue. M5 progeny exhibit tremendous temperament thickness and extraordinary carcase traits. The best attribute is the phenomenal daughters he leaves in the herd. You can expect his sons to do the same in your herds. Pictured is pentire Quarterback Q4 2020 sale topper \$12000 to Jodie and Paul Ritter Rosevale Singleton, a son of Mt Hunter Magistrate M5, the top-priced heifer Pentire Evilest Q1 \$4250 also sired by M5.

Pentire Angus Reference Sire HF Alcatraz 60F sold for \$200,000 at the Hamilton Farms 24th Annual Bull Sale. He has been admired by all who have laid eyes on him, especially at the National Western Stock Show in Denver 2019 and 2020. Alcatraz has tremendous width in his top from behind his shoulders back to his pins and finishes off with a wide butt exhibiting excellent muscle shape. He has that proud herd bull look to his front end, lots of crest and power with a nicely shaped head accompanied by perfect feet and leg structure. 'Pentire Angus are excited for the future of our HF Alcatraz 60F progeny.' They are born quickly with extraordinary early growth until weaning lots of thickness carcase shape, and they look fantastic. Alcatraz is the most exciting sire introduced into the pentire Angus program of recent times. He is going to have a significant impact on our program for a long time to come.

# BUY your BULLS from a CATTLEMAN not a SALESMAN.

Why does Justin Richards of Pentire Angus feel strongly about this? He feels that it takes generations of selective breeding and culling to develop quality genetics and avoid 'one-hit wonders'. Top-quality females are an absolute necessity, providing structural soundness, docility, length, thickness and muscle. A true cattleman lives in their cows and bulls from the time they are born and watches them grow and develop from day one. They know what is working and what is not working. Most importantly, they know what will benefit your herd and help you make money by utilising the very best of their genetics.

## Why choose Pentire Angus?

Pentire Angus utilises the best outcross genetics from across the world, which provides a point of difference to most of the Australian Angus population. These genetics have the ability to add carcass shape, thickness, easy doing ability, outstanding phenotype and, in long term, leave you with an excellent line of great-looking, fertile and functional replacement females. Our top-quality bulls are presented each year through our annual sale in excellent condition, so you,

as the potential buyers, can view them and notice their genetic merit to the fullest. Each one of our bulls are ready to go straight to work for you and your herd. Our Pentire Angus bulls will go out and breed phenotypically

great looking cattle that will take Pentire Angus' client herds, and the industry in general, forward in today's modern market by reducing production costs for our clients. A highly efficient production system does not mean low inputs. On the contrary, the best way we find to achieve a low production cost is to increase output, which means optimising every individual animals' performance on each hectare of land we have. We are stacking the genetic gains in client herds for massive productivity gains. To make what we do in this challenging industry worthwhile, we require bulls with excellent structure, muscle, yield, efficiency and fabulous good looks.

#### DISCLAIMER AND PRIVACY INFORMATION

#### **Attention Buyer**

Animal details included in this catalogue, including but not limited to pedigree, DNA information, Estimated Breeding Values (EBVs) and Index values, are based on information provided by the breeder or owner of the animal. Whilst all reasonable care has been taken to ensure that the information provided in this catalogue was correct at the time of publication, Angus Australia will assume no responsibility for the accuracy or completeness of the information, nor for the outcome (including consequential loss) of any action taken based on this information.

#### **Parent Verification Suffixes**

The animals listed within this catalogue including its pedigree, are displaying a Parent Verification Suffix which indicates the DNA parent verification status that has been conducted on the animal. The Parent Verification Suffixes that will appear at the end of each animal's name.

The suffix displayed at the end of each animal's name indicates the DNA parentage verification that has been conducted by Angus Australia.

PV: both parents have been verified by DNA.

SV: the sire has been verified by DNA.

DV: the dam has been verified by DNA.

#: DNA verification has not been conducted.

E: DNA verification has identified that the sire and/or dam may possibly be incorrect, but this cannot be confirmed conclusively.

#### **Privacy Information**

In order for Angus Australia to process the transfer of a registered animal in this catalogue, the vendor will need to provide certain information to Angus Australia and the buyer consents to the collection and disclosure of that information by Angus Australia in certain circumstances. If the buyer does not wish for his or her information to be stored and disclosed by Angus Australia, the buyer must complete the form included below and forward it to Angus Australia. If the form is not completed, the buyer will be taken to have consented to the disclosure of such information.

#### BUYERS OPTION TO OPT OUT OF DISCLOSING PERSONAL INFORMATION TO ANGUS AUSTRALIA

If you have any questions or queries regarding any of the above, please contact Angus Australia on (02) 6773 4600 or email office@angusaustralia.com.au

Updated 25/11/2020
